

# How to learn and learn fast

# Table of contents

**01** What is learning?

**05** How to apply tools and technology to learning ?

**02** Why Learning is So Important

**06** How do I assess myself while studying?

**03** How many learning methods are there?

**07** Conclusion

**04** How to schedule study time?

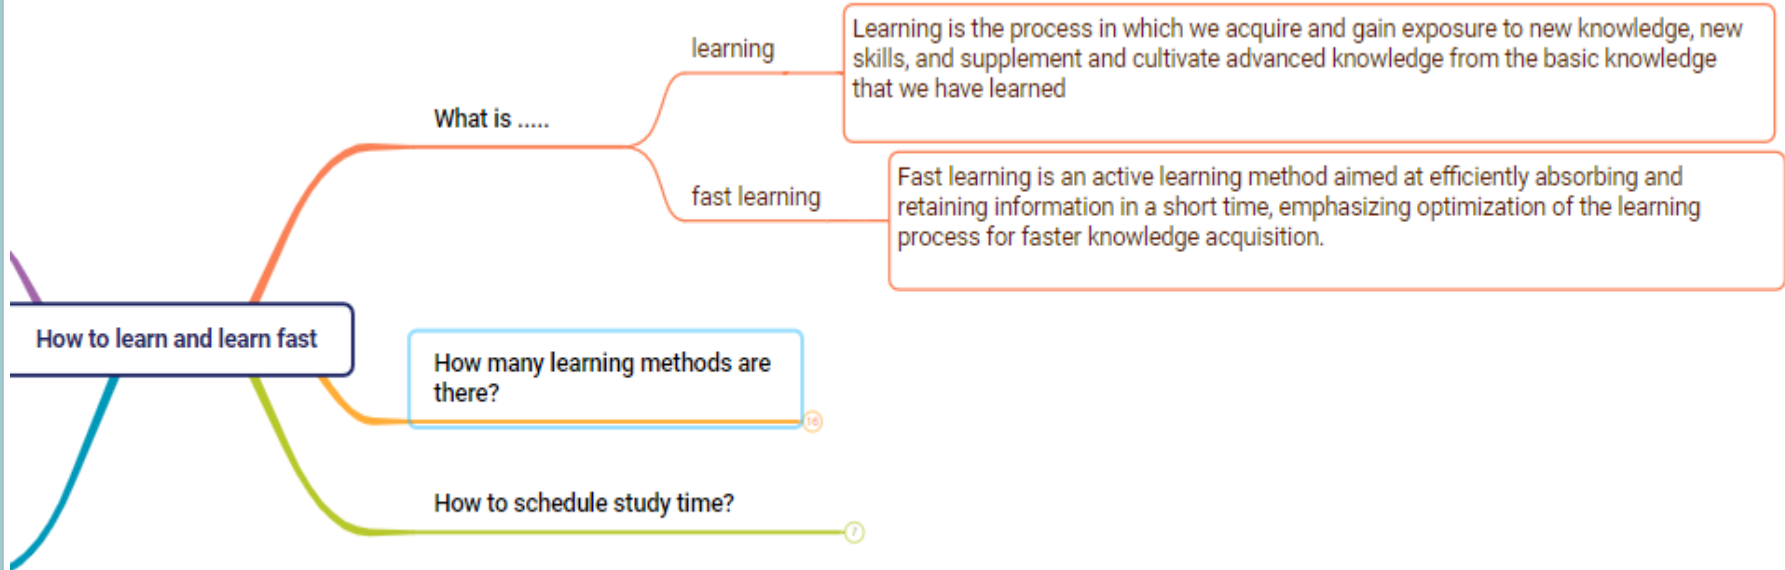

# 01 What is learning?

Learning is the process in which we acquire and gain exposure to new knowledge, new skills, and supplement and cultivate advanced knowledge from the basic knowledge that we have learned

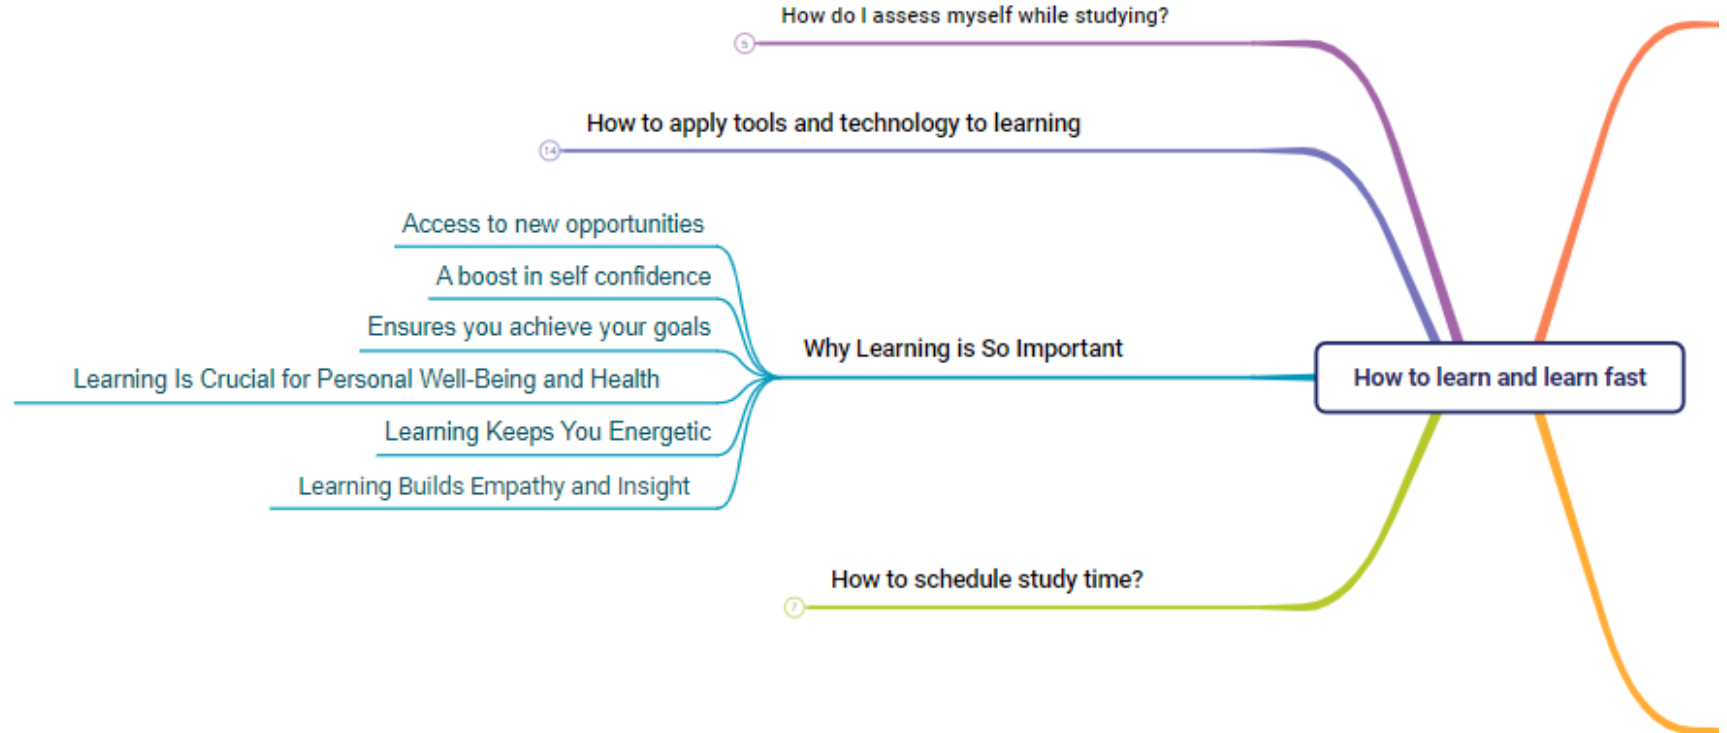

Fast learning is an active learning method aimed at efficiently absorbing and retaining information in a short time, emphasizing optimization of the learning process for faster knowledge acquisition.
